## ABOUT ME

An elite Database Engineer with 4+ years of expertise architecting complex systems across PostgreSQL, MySQL, and AWS Aurora. Delivers a 100% success rate in migrations using AWS DMS and guarantees 99.99% uptime via robust HA, DR, and 24/7 backups. Drives 20%+ cost optimization and elite performance optimization/tuning through infra automation and shell script workflows. Ensures 100% compliance with CIS and GDPR guidelines while integrating Gen AI solutions with DBs across 2+ enterprise environments, building highly secure and intelligent data ecosystems.

## SKILLS

**Database Technologies:** PostgreSQL, MySQL, AWS Aurora, RDS

**Platform & Automation:** Terraform, Docker, Shell Script, Python, Linux, Git

**DB Tools & Utilities:** pg\_dump/pg\_restore, pgTune, pgBouncer, pg\_basebackup, pt-archiver, pt-osc, pt-show-grants, mydumper/mysqldump, ProxySQL

## WORK EXPERIENCE

### Database Administrator

*PayU Payments, Gurugram, India*

*Sept 2025 - Present*

- Implemented GenAI solution for automated slow query detection and optimization to improve system performance by 10%
- Architected and evolved PostgreSQL 16 and MySQL 8 topologies to support high-load environments, ensuring seamless replication and scalability.
- Optimized cloud resource utilization by automating partition archiving, yielding 10% cloud cost savings.
- Provided technical leadership and mentorship to a team of 4 DBA, ensuring 24/7 operational excellence and defining incident SLO.
- Designed and maintained robust access control models (RBAC) and ensured high data security standards.
- Collaborated with cross-functional product leads(1-1) to advise on high-impact database architectural issues and influence future technology direction
- Performed advanced data modeling, multi-tenant migrations, and automated backup & recovery processes, including point-in-time recovery (PITR) RPO to 30 Seconds

### Cloud Engineer I & II

*Highradius Pvt Ltd, Hyderabad, India*

*July 2023 - Sept 2025*

- Designed and implemented highly complex logical and physical PostgreSQL databases supporting 100+ TB of data and 10+ servers, ensuring 24/7 platform availability.
- Executed 100 GB+ table/schema migrations, blue/green upgrades,schema changes.
- Performed advanced data modeling and mapping to support multi-tenant to dedicated-tenant database migrations(500+ GB clusters
- Enhanced observability and monitoring by implementing Grafana v12, PMM, and analyzing metrics using pg\_stat\_statements
- Drove 50+ root-cause analysis (RCA) for database incidents, documenting corrective actions to harden platform reliability.
- Improved production stability by proactive performance tuning, capacity planning, and rapid troubleshooting of 20+ high-impact database issues.
- Audited databases and deployed security controls aligned with CIS, GDPR, and PCI.
- Upgraded PostgreSQL(13.2 to 16.8) and MySQL (5.7 to 8) major/minor versions using blue/green deployments and read-replica techniques.
- Migrated 10+ database clusters from one datacenter to other datacenter (AWS to GCP).
- Deployed percona tools like pt-osc, pt-kill, pt-show-grants and XtraBackup 8 for database reliability.
- Involved in table partitioning & archiving activity for cloud cost reduction and performance boost by 20%.

### Product Intern

*Highradius Pvt Ltd, Bhubaneswar, India*

*June 2022 - June 2023*

- Created an inventory and automated process workflows for database information capture.
- Automated database alerts configuration in cloudwatch.
- Proactively monitored database systems using Grafana to ensure 24/7 uptime and early issue detection.

## EDUCATION

### GIET University

*Bachelor Of Technology, Computer Science*

*Gunupur, Odisha, India*

*Aug 2019 - May 2023*

## RECOGNITIONS

- Honored Highako of the Year (2022) at Highradius for exceptional performance among 200+ employees.
- Recognized Best Student of the Year (2023) at GIETU for top academic performance among 500+ peers.
- Won Fresher of the Year (2024) at Highradius for solutions improving efficiency by 30% among 100+ peers cohort.
